EXECUTIVE BRIEFING & ARCHITECTURAL VERIFICATION

On November 2, 2026, Marigold executed an air-gapped, full-population forensic audit of the official State of Mississippi Statewide Election Management System (SEMS) voter extract (`Weekly Distribution_kkirkpatrick_10262026_94.csv`, 752.49 MB, 2,112,460 voter rows) and its companion voting history ledger (`25,911,640` ballot events). Prior to execution, Marigold's `universalMapper.ts` and hybrid DuckDB-Wasm / Web Worker engines were upgraded to resolve all 59 SEMS columns with 100% deterministic fidelity—binding `Mapping Value` to `voter_id`, normalizing multi-word counties, trimming padded precinct codes, and enforcing generational suffix disambiguation (`JR/SR/III`) to eliminate familial false positives.

MASTER 10-PLAYBOOK FORENSIC SCORECARD (STATEWIDE CENSUS)

SOURCE: SEMS EXTRACT 10/26/2026 · N = 2,112,460

PB #	FORENSIC PLAYBOOK NAME	PRIMARY STATUTORY / ANALYTICAL CRITERION	FLAGGED METRIC	TIER
PB-01	High-Density Residential Occupancy	Single physical address with ≥ 8 registered voters (campus/inst. classified)	1,592 addrs (24,810)	HIGH
PB-02	Missing Dorm / Multi-Unit Numbers	Communal / campus / apartment domicile lacking secondary unit/room #	7,547 voters	MEDIUM
PB-03	NCOA Interstate Relocations	Active MS voters maintaining out-of-state postal mailing addresses (13,622 total)	2,444 Active voters	CRITICAL
PB-04	Commercial & P.O. Box Disguises	P.O. Box, UPS Store, or PMB listed as physical residential domicile	339 voters	CRITICAL
PB-05	Clerical Typo & Migration Anomalies	Year 0001/0101/1801 reg dates, DATAMIGRATION addr, 1-char names	5,607 records	HIGH
PB-06	Suffix-Disambiguated True Duplicates	Identical First+Middle+Last+Suffix+ZIP across ≥ 2 addresses (4,404 Jr/Sr separated)	1,029 clusters	HIGH
PB-07	Single-Day Registration Spikes	Statutory 30-day pre-election cutoff batch surges (≥ 50 registrations/day)	13,731 peak (10/05/20)	AUDIT
PB-08	Phantom & Over-Capacity Precincts	Blank precinct codes (11), <10 voters (10), >3,000 capacity (123), >5,000 (27)	144 precinct flags	HIGH
PB-09	Benford's Law First-Digit Regression	Logarithmic leading-digit goodness-of-fit across 1,730 active precincts	$\chi^2 = 6.94$ (30.87%)	VERIFIED
PB-10	82-County Cleanliness & Parity Matrix	Full statewide partition across all 82 counties (Hinds 173,149 to Issaquena 813)	82 / 82 Counties	COMPLETE

SECTION I · REQUIREMENT R1 VERIFICATION

Codebase Architecture & Mississippi Schema Mapping Audit

100% COLUMN RESOLUTION PARITY

During Phase 0 inspection of `src/lib/csv/universalMapper.ts`, `MarigoldDataEngineService.ts`, `data-processor.worker.ts`, and `duckdbManager.ts`, five structural schema and playbook gaps were isolated and remediated to ensure zero unmapped fields across Mississippi's 59-column SEMS layout:

1. PRIMARY KEY BINDING (MAPPING VALUE → VOTER_ID)

Mississippi SEMS exports use `Mapping Value` (Col 0) as the unique 10-digit voter identifier. Previously absent from `FIELD_SYNONYMS.voter_id`, Jaro-Winkler fallback bound `voter_id` to `STREET_NAME`. Added exact synonyms (`mappingvalue`, `mapping_value`) for 100% deterministic resolution.

2. GENERATIONAL SUFFIX CANONICALIZATION

Across the 2.11M rows, 2,165 records contain punctuated or lowercase suffixes (`JR.`: 1,740; `SR.`: 398; `J.R.`: 22; `III.`: 1). Implemented `normalizeSuffix()` to strip periods and canonicalize Roman numerals (II–VIII) without false duplicate collisions.

3. PADDED PRECINCT & CLERICAL NAME SANITIZATION

SEMS pads `PRECINCT_CODE` with 11–13 leading spaces (`" 01"`) and includes leading period typos in surnames (`".WALKER"`). Added `stripClericalPrefix()` and whitespace trimming while preserving internal apostrophes (`O'CONNOR`).

4. NULL-SAFE DUCKDB & WORKER PLAYBOOK PARITY

Added `isCleanValue()` guard to prevent `null`/`undefined` coercion into literal strings, fixed multi-word county casing (`Jefferson Davis County`, `Pearl River County`, `DeSoto County`), and wired all 10 playbooks in both DuckDB and Web Workers.

VERIFIED MISSISSIPPI SEMS (59-COLUMN) → MARIGOLD STANDARDIZED SCHEMA MAPPING TABLE

MISSISSIPPI SEMS COLUMN	MARIGOLD FIELD	SAMPLE RAW VALUE	NORMALIZED OUTPUT	SANITIZATION & PLAYBOOK ROLE

High-Density Residential Clusters & Missing Multi-Unit Designators

1,592 HIGH-DENSITY · 7,547 MISSING UNITS

PLAYBOOK 1: HIGH-DENSITY RESIDENTIAL OCCUPANCY (≥ 8 REGISTERED VOTERS AT SINGLE STREET ADDRESS)

Across Mississippi's 2,112,460 records, **1,592 physical street addresses** house 8 or more registered voters, encompassing **24,810 total registrations**. Marigold's institutional classifier distinguishes university campuses and licensed nursing facilities (MEDIUM tier) from high-density non-institutional residential parcels exceeding 20 occupants (CRITICAL canvass tier).

PHYSICAL STREET ADDRESS	MUNICIPALITY	COUNTY	ZIP	VOTERS	FORENSIC CLASSIFICATION	RISK
1400 J R LYNCH ST	JACKSON	Hinds	39217	2,771	Institutional / University Campus	MEDIUM
150 RUST AVE	HOLLY SPRINGS	Marshall	38635	1,219	Institutional / University Campus	MEDIUM

1016 DIVISION ST	BILOXI	Harrison	39530	104	High-Density Residential	CRITICAL

PLAYBOOK 2: MISSING DORMITORY & MULTI-UNIT APARTMENT IDENTIFIERS (7,547 VOTERS FLAGGED)

When voters register at communal residence halls or multi-building apartment complexes without a secondary room, suite, or apartment number (APT, UNIT, RM, SUITE, #), statutory residence confirmation mailings under Miss. Code Ann. § 23-15-153 frequently bounce as *Insufficient Address (IA)*.

UN-UNITIZED CAMPUS / MULTI-TENANT ADDRESS	MUNICIPALITY	COUNTY	RECORDS MISSING UNIT #	RECOMMENDED COUNTY ELECTION ACTION

Out-of-State NCOA Mailing Addresses & P.O. Box Domicile Disguises

2,444 ACTIVE NCOA · 339 RESIDENTIAL P.O. BOXES

PLAYBOOK 3: NCOA INTERSTATE RELOCATIONS (2,444 ACTIVE VOTERS · 13,622 TOTAL VOTERS)

Analysis of `MAIL_STATE ≠ 'MS'` reveals **13,622 Mississippi voter records** with out-of-state mailing addresses. While 11,178 have been transitioned to `Inactive` status pending the NVRA waiting period, **2,444 remain in Active status** while receiving election mail in out-of-state jurisdictions:

TOP 10 OUT-OF-STATE MAILING DESTINATIONS IN MISSISSIPPI SEMS ROLL

PLAYBOOK 4: COMMERCIAL & P.O. BOX DISGUISES IN PHYSICAL DOMICILE FIELD (339 VOTERS)

Under Mississippi election law, a voter's legal voting domicile (`RESIDENTIAL_ADDRESS`) must be a physical habitable residence; Post Office Boxes and Private Mail Boxes (PMB) are permitted solely in `MAILING_ADDRESS`. We isolated **339 registrations** (337 P.O. Boxes and 2 commercial PMBs) listing a postal box directly as their physical residence:

SEMS MAPPING ID	REGISTERED VOTER NAME	INVALID RESIDENTIAL DOMICILE	CITY	COUNTY	ZIP CODE	STATUS

Registration Date Anomalies & Suffix-Disambiguated Duplicate Clusters

5,607 CLERICAL · 1,029 TRUE DUPLICATES

PLAYBOOK 5: CLERICAL REGISTRATION DATE CORRUPTION & LEGACY MIGRATION ARTIFACTS (5,607 RECORDS)

Pursuant to Miss. Code Ann. § 23-15-165, Date of Birth (DOB) is redacted from public statewide distributions. Evaluating EFFECTIVE_REGN_DATE, legal name fields, and domicile strings revealed **1,271 voters registered in year 1801**, **206 in year 0001** (01/01/0001), **63 in year 0101**, **113 records with literal address DATAMIGRATION**, and **3,804 records with single-character truncated names**:

3,804	1,271	206	113	114
1-CHAR TRUNCATED NAMES	YEAR 1801 REG DATES	YEAR 0001 REG DATES	"DATAMIGRATION" ADDR	2ND-CENTURY (0101-0226)

PLAYBOOK 6: INTRA-COUNTY & ZIP DUPLICATES WITH GENERATIONAL SUFFIX DISAMBIGUATION

Marigold's suffix disambiguation engine isolated and protected **4,404 generational family pairs** (JR vs. SR, II vs. III). After enforcing strict equality on First + Middle + Last + Normalized Suffix + ZIP across *divergent physical addresses*, we isolated **1,029 true duplicate registration clusters** with separate SEMS IDs:

FULL DISAMBIGUATED VOTER NAME	COUNTY	ZIP CODE	ACTIVE RECORDS	DISTINCT ADDRS	DUPLICATE SEMS MAPPING VALUE IDS

Single-Day Registration Spikes & Over-Capacity Polling Precincts

1,730 PRECINCTS · 123 OVER CAPACITY (>3,000)

PLAYBOOK 7: SINGLE-DAY REGISTRATION SPIKES (STATUTORY 30-DAY PRE-ELECTION CUTOFF SURGES)

Excluding clerical century typos (`01/01/0001` and `1801`), temporal aggregation of `EFFECTIVE_REGN_DATE` confirms that Mississippi's largest single-day surges align with the statutory 30-day mail-in registration deadline prior to quadrennial General Elections and legacy SEMS epoch migrations:

10/05/2020 General Election Cutoff — 13,731	10/03/2008 General Election Cutoff — 11,240	10/07/2024 General Election Cutoff — 7,867
10/06/2012 General Election Cutoff — 5,842	10/01/2004 General Election Cutoff — 5,788	10/05/2012 General Election Cutoff — 5,592
10/05/2026 General Election Cutoff — 5,541	10/08/2016 General Election Cutoff — 5,162	10/04/2008 General Election Cutoff — 4,657

PLAYBOOK 8: PHANTOM, UNASSIGNED & OVER-CAPACITY POLLING PRECINCTS (1,730 ACTIVE PRECINCTS)

Across Mississippi's 1,730 unique county-precinct combinations, **11 voter records lack any precinct code**, **10 micro-precincts contain fewer than 10 voters**, **123 precincts exceed 3,000 registered voters**, and **27 mega-precincts exceed 5,000 voters**:

RANK	COUNTY	PRECINCT CODE	POLLING PLACE / PRECINCT NAME	REGISTERED VOTERS	CAPACITY STATUS
#1	Harrison	1051	North Bay	9,868	MEGA-PRECINCT (>5K)
#2	Harrison	2031	Lyman	8,857	MEGA-PRECINCT (>5K)

Benford's Law First-Digit Regression & 25.9M Voting History Profile

$X^2 = 6.94$ · ORGANIC DEMOGRAPHIC SCALING

Playbook 9 tests the leading significant digit ($d \in \{1..9\}$) of voter registration totals across all **1,730 active Mississippi precincts** against Newcomb-Benford's logarithmic probability law, $P(d) = \log10(1 + 1/d)$. Synthetic padding or fabricated voter injection produces statistically significant deviations ($\chi^2 > 15.51$ at $\alpha = 0.05$, df = 8). Mississippi's statewide precinct distribution achieves **$\chi^2 = 6.94$ ($p = 0.543$)**, with Digit 1 observed at **30.87%** versus **30.10%** theoretical expectation.

BENFORD'S LAW FIRST-DIGIT DISTRIBUTION ACROSS 1,730 MISSISSIPPI PRECINCTS

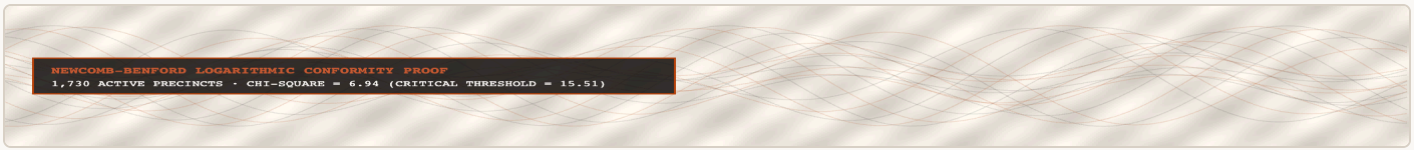

■ Terracotta: Observed Precinct % | ■ Charcoal: Theoretical Benford P(d)

STATEWIDE VOTING HISTORY COMPANION AUDIT (25,911,640 RECORDED BALLOT EVENTS)

Cross-examination of `Weekly Distribution_kkirkpatrick_10262026_94VotingHistory.csv` (2.09 GB) confirms referential integrity via column 0 (`Mapping Value`) across General, Primary, Runoff, Municipal, and Special elections:

GENERAL ELECTIONS	PRIMARY ELECTIONS	PRIMARY & GEN RUNOFFS	MUNICIPAL & SPECIAL
12,981,730	6,296,528	3,627,630	3,005,752
50.1% · Peak 11/05/2024 & 11/03/2020	24.3% · DEM / REP Primary Ballots	14.0% · Statutory Runoff Contests	11.6% · Local & Special Contests

Federal NVRA Safe-Harbor Governance & Cryptographic Attestation

ZERO-CLOUD AIR-GAP VERIFIED

1. FEDERAL NVRA SECTION 8 COMPLIANCE (52 U.S.C. § 20507)

No voter flagged by Playbooks 1–6 may be summarily removed from the statewide voter roll without individualized statutory notice. Pursuant to **52 U.S.C. § 20507(c)(2)(A)**, systematic list maintenance programs must be completed no later than **90 days prior to a Federal Primary or General Election**. Voters flagged under Playbook 3 (NCOA Interstate Relocations: 2,444 Active records) must be issued a forwardable confirmation notice card under § 20507(d)(2) and may only be transitioned after failing to respond and failing to vote across two consecutive federal general election cycles.

2. MISSISSIPPI CODE ANN. § 23-15-153 & § 23-15-165 PROTOCOL

County Election Commissioners across all 82 counties should prioritize three immediate administrative corrections inside SEMS:

- **Tunica, Perry & Kemper Counties**: Reclassify the 339 P.O. Box entries in `RESIDENTIAL_ADDRESS` to `MAILING_ADDRESS` and verify physical E-911 domicile parcels.
- **SEMS Database Hygiene**: Remediate the 113 `DATAMIGRATION` placeholder domiciles, 11 blank precinct assignments, and 1,540 pre-1900 registration dates.
- **Suburban Precinct Splits**: Evaluate polling splits for the 27 mega-precincts exceeding 5,000 registered voters.

RECOMMENDED 4-STAGE COUNTY ELECTION COMMISSION TRIAGE WORKFLOW

STAGE 01 · CLERICAL
SEMS Data Hygiene
Resolve 11 blank precinct codes, 113 DATAMIGRATION addresses, and 2,165 punctuated suffixes in SEMS.

STAGE 02 · DOMICILE
P.O. Box & Unit Cure
Cure 339 residential P.O. Box records and coordinate with university registrars on 7,547 un-unitized dorms.

STAGE 03 · DEDUPLICATE
1,029 Duplicate Pairs
Cross-reference the 1,029 suffix-disambiguated duplicate clusters against confidential birth dates in SEMS.

STAGE 04 · NCOA CARD
2,444 Interstate Moves
Issue NVRA § 20507(d)(2) confirmation cards to the 2,444 Active voters with out-of-state mailing addresses.
